

TEACH TECH

We teach technology so you don't have to.

What does streaming mean? How do I use bluetooth? Does an app use the internet? What is data anyway?

Tired of explaining technology to the elders in your life? **TEACH TECH** does it for you.

Instead of arguing about how to join a Zoom call or use a GPS, you're freed up to spend quality time with your loved ones the way *you* want to.

They get all of the information. You get none of the frustration.

Tired of feeling like your family's personal IT expert?

It can be difficult, time-consuming, and annoying to be the person that the elders in your life go to for all of their technology questions.

You're not a human Google machine, after all. You'd tell them that, but then you'd have to explain Google.

Let us take over.

Our **Tech Teachers** are pillars of warmth and patience, who take the time to get to know clients one-on-one, what they're interested in learning, and how best to teach them.

Your loved one will be in good hands and *you'll* get countless hours of your life back.

We offer:

- Over-the-phone consultations
- One-on-one video sessions
- Video and written tutorials
- Live classes in-person or online
- Packages based on topic, device, and skill level
